

Miko | Progress CO₂-Performance Ladder

In our previous ESG Newsflashes, we presented the objectives for the CO₂ Performance Ladder and mentioned that we have since received our certificate for it. This serves as proof that we have demonstrated, together, that we are genuinely reducing emissions for a better environment.

When it comes to CO₂ reduction and thus contributing to a better environment, our own energy consumption and CO₂ reduction are, of course, the starting point. The reduction policy and associated plans are based on periodic measurements, inventories, evaluations, and studies of the risks and CO₂ emissions present within Miko.

In this fourth Newsflash, we show you how much energy we consume and how much CO₂ we emit as a result. We also demonstrate the progress we are making in this area. Therefore, this could also be referred to as a progress report.

Miko's objectives for CO₂-reduction

For your reference we mention our main objectives and ambition for CO₂-reduction below:

Main Objectives	
- 35 % reduction in CO ₂ emissions in 2028 versus reference year 2022.	
- 100% reduction in CO ₂ emissions in 2050 versus reference year 2022.	

Above mentioned objectives are related to the raw coffee that we are purchasing. By doing so we can easily monitor our progress in reduction.

Further specified for Scope 1 and Scope 2 + Business Travel our objectives are as follows:

- **Scope 1:** 16 % CO₂-reduction in 2028 versus 2022.
- **Scope 2 + Business Travel:** 90 % CO₂-reduction in 2028 versus 2022.

CO₂- Footprint 2023

The table below shows the CO₂ footprint of Miko Group for the entire year 2023, compared to the CO₂ footprint for the entire year 2022 (the baseline measurement year). The CO₂ footprint for 2022 was previously included in the first ESG Newsflash. This overview contains our energy sources (diesel, gasoline, gas, electricity, etc.), the amounts we have consumed, and the resulting CO₂ emissions. We will continue to communicate about this biannually. The next footprint and progress report will cover the first half of 2024.

Miko Group - CO ₂ -emissions 2023:					
Scope	Energy	Amount		tons CO ₂	%
Scope 1	Fuel Diesel	742 420,58	Litre	2 413,41	36,62%
	Fuel Euro 95 (petrol)	168 977,78	Litre	457,65	6,94%
	Gas m ³	990 066,34	m ³	2 469,40	37,47%
Scope 2	Electricity	5 215 539,88	kWh	1 143,86	17,36%
	Elektricity for cars	84 280,00	kWh	18,53	0,28%
	Business km with private car	1 150,00	km	0,22	0,00%
	Public transport	144 037,10	km	2,88	0,04%
	Flights <700km (regional)	29 573,42	km	6,92	0,11%
	Flights 700-2500km (Europe)	256 059,0	km	44,04	0,67%
	Flights >2500km (Intercontinental)	208 703,00	km	32,77	0,50%
	Total Scope 1			5 340,46	81,04%
	Total Scope 2			1 249,22	18,96%
	Total 1 +2			6 589,68	100,00 %

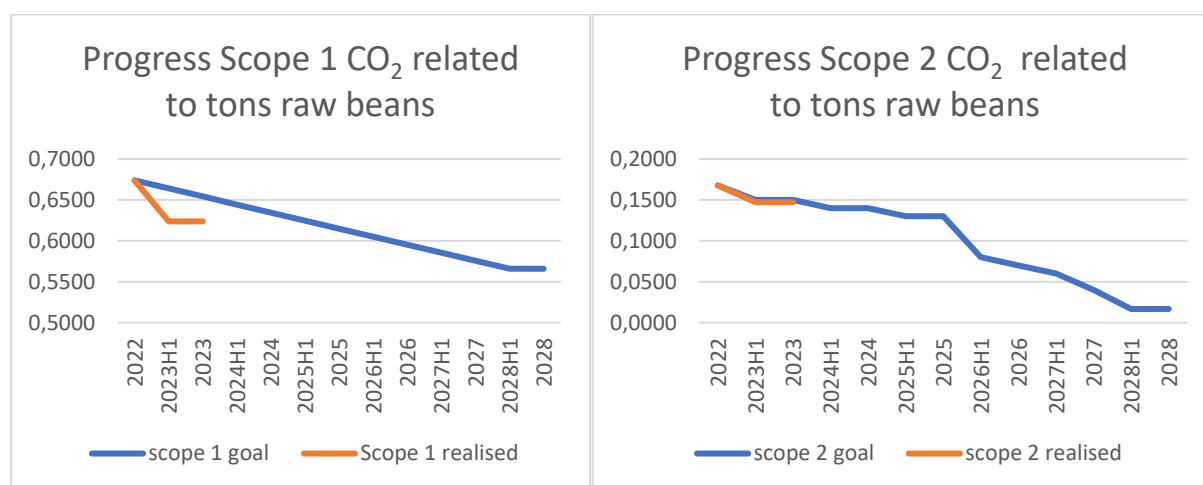

Scope 1 (direct emissions) are emissions that are released by installations owned or controlled by the organization (e.g., heating, fuel consumption).

Scope 2 (indirect emissions) are emissions that do not originate from the organization itself but are utilized by the organization (e.g., electricity generated elsewhere but used by the organization). Business Travel also falls under Scope 2.

Progress

As previously mentioned, we will continue to measure our progress. In 2022, we started mapping our consumption and, consequently, our emissions. Now that we have done this for another year, we can effectively continue to measure and compare our progress. We will monitor this closely and adjust our objectives if necessary.

As far as we can see now, we are on track for Scope 1 and are emitting less CO₂ than the target we set for ourselves. For Scope 2, we are exactly on schedule and are emitting almost the same amount as the target we set for ourselves.

ABOUT MIKO

Miko has been active in coffee service for more than 220 years. The group achieved a turnover of €292 million in 2023. Miko is an international group with its own companies in Belgium, France, the UK, the Netherlands, Germany, Denmark, Norway, Sweden, Poland, the Czech Republic, Slovakia, Australia and the United States.

More information about Miko can be found at www.mikogroup.be. For any questions regarding this message, please contact compliance@miko.be.
